Results will be decided by the application of the Time-on-Time Simplified Scoring Option, using the ToT Offshore rating as printed on each boat's ORCi Certificate, as a multiplier of elapsed time.

The boat with the lowest corrected time (after application of scoring penalties, if any) will be scored first.

8.3 PHS

Results will be calculated by the application of Time Correction Factors (TCF's) as a multiplier of elapsed time.

A boat's TCF will be determined by the Race Committee or its nominee. The TCF will not be subject to protest or dispute (amends RRS 60.1 and 62.1(a)).

The boat with the lowest corrected time (after application of scoring penalties, if any) will be scored first.

The boat with the lowest elapsed time (after application of scoring penalties, if any) will be scored first.

8.5 Cruising Division

The Cruising Division will be scored on a points system, details of which will be contained in the Sailing Instructions.

Boats will prior to the start nominate the times at which they intend to first cross certain latitudes, and be awarded points based on the accuracy of that prediction. Points will also be awarded or deducted based on engine and autopilot usage.

The boat with the highest number of points (after application of scoring penalties, if any) will be scored first.

The scoring system will not be subject to protest or dispute (amends RRS 60.1 and 62.1(a)).

A boat with a current, valid certificate demonstrating that it achieves International Standard ISO 12217-2 Design Category A with a STIX value increased to a minimum of 35 shall supply that certificate.

In the calculation of stability data:

- The hydrostatics and stability demonstrating the yacht's compliance with ISO Category A shall be derived from measurement of the freeboards and righting moment of the actual yacht by a qualified source (ie an inclination test)
- Deck and other enclosed volume above the sheerline may be taken into account, in which case offsetting cockpit volume shall also be taken into account.
- Mass shall be taken as Minimum Operating Mass as defined by ISO 12217-2, paragraph 3.5.3

The entrant will be consulted prior to this occurring.
