## APPENDIX B – STABILITY REQUIREMENTS

### General

The requirements specified in this appendix apply to all boats intending to enter regardless of the handicap category in which they intend to enter.

**Competitors found to be falsifying documentation, deliberately invalidating certificates or otherwise misleading the Race Committee with regard to stability of their boat are subject to action under RRS 69.1. If found guilty the penalty could include disqualification from the Noakes Sydney Gold Coast Yacht Race 2024. The incident would also be reported to Australian Sailing.**

A determination by the Organising Authority or the Race Committee as to the suitability of supplied documentation in demonstrating a boat's compliance with the stability requirements, as to whether there is a satisfactory margin as required by this appendix or as to a boat's compliance with the stability requirements is final and binding.

### Non-Moveable Variable Ballast Boats

A boat shall provide evidence as follows to demonstrate that it achieves not less than:

- an ORCi Stability Index of 110 for the configuration in which the boat proposes to race; or
- International Standard ISO 12217 - 2 Design Category A except that the angle of vanishing stability (AVS) shall be a minimum of 115 (The OA may elect to obtain technical advice as to a boat's eligibility and the data and documentation supplied, at the cost of the entrant concerned. This may include having measurements redone and documentation reproduced by another Naval Architect).

### Moveable Variable Ballast Boats

A boat shall provide evidence as follows to demonstrate that it achieves not less than:

- an ORCi Stability Index of 110 and a Ballast Leeward Recovery Index of 0.9 for the configuration in which the boat proposes to race; or
- International Standard ISO 12217 - 2 Design Category A and a Knockdown Recovery Factor of minimum 0.9 (The OA may elect to obtain technical advice as to a boat's eligibility and the data and documentation supplied, at the cost of the entrant concerned. This may include having measurements redone and documentation reproduced by another Naval Architect).

### Further Requirements:

#### Boats holding a current, valid ORCi Certificate

A boat with a current, valid ORCi Certificate shall supply that certificate, including the Stability and Hydrostatics Datasheet, accompanied by a completed Stability Declaration as supplied by the Organising Authority.

#### Boats previously holding a valid ORCi Certificate

A boat without a current valid ORCi Certificate but with a previously valid (but not current) certificate shall supply its most recent previously valid (but not current) certificate, including the Stability and Hydrostatic Datasheet, accompanied by a completed Stability Declaration supplied by the Organising Authority.

#### Boat achieving ISO 12217-2 Design Category A

In the calculation of the stability data:

- The hydrostatics and stability demonstrating the yacht's compliance with ISO Category A shall be derived from measurement of the freeboards and righting moment of the actual yacht by a qualified source (ie an inclination test)
- Deck and other enclosed volume above the sheerline may be taken into account, in which case offsetting cockpit volume shall also be taken into account.
- Mass shall be taken as Minimum Operating Mass as defined by ISO 12217-2, paragraph 3.5.3
- A GZ curve shall be submitted as part of the ISO statement

#### All boats

Other than in the case of a boat that submits a current, valid ORCi Certificate, the Organising Authority may elect to obtain technical advice as to a boat's eligibility and the data and documentation supplied at the cost of the entrant concerned. The entrant will be consulted prior to this occurring.
